- Systems integration, process automation, and dynamic dashboards development
- **Languages:** Portuguese (native), English (advanced)

EXPERIENCE

Power Platform Developer	ARLANXEO	Porto Alegre, BR (On-site)	2024 - Present
--------------------------	----------	----------------------------	----------------

ARLANXEO is a global specialty rubber manufacturer. I work in the IT department, developing Power Platform solutions focused on process automation, systems integration, and corporate workflow optimization with international teams.

- **Activity Management App:** Built a PowerApps application integrated with SharePoint and Power Automate for automatic data migration from Excel, status tracking, and weekly planning, including a Power BI dashboard for activity history and monitoring.
- **Invoice Generation App:** Developed a PowerApps solution to generate PDF invoices via Power Automate, with JavaScript/SharePoint integration for document merging.
- **HR Request Management System:** Created a system to manage and analyze HR requests with automated email summaries via Power Automate.
- **Corporate Registry Management:** Developed a JavaScript web part integrated with PowerApps and SharePoint for managing corporate registrations.
- **Employee Transportation App:** Built a PowerApps solution for scheduling corporate carpools, featuring ride history and a Power BI dashboard.
- **IBM Notes → SharePoint Migration:** Automated document conversion and migration via Python scripts and Power Automate in collaboration with an international team.

Tech Stack: PowerApps, Power Automate, Power BI, SharePoint, JavaScript, Python, Microsoft Copilot Studio, Node, React, Vue
